Weather Summary/Alert:

Cloudy weather with moderate to heavy rainfall may prevail in the upcoming 5 days with maximum temp of 27-29°C and minimum temperature of 21-23°C.

General Advisory:

In view of heavy rains received gall midge is likely to occur in paddy. To control apply carbofuran 3g granules 10 kg./acre.

SMS Advisory:

Tie up and harvest the top most panicles on lodged crop wherever possible and spray 5% salt solution.

Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	• In view of rainfall forecast farmers are advised to provide drainage channels in paddy nurseries to protect the seedlings. After removing excess water apply 15 kg urea and 15 kg potash per acre. • The present weather conditions are favourable for gall midge. To control apply carbendizem 3g granules 10 kg./acre.
GROUNDNUT	• In view of rains received farmers are advised to harvest the matured groundnut before germination. • In view of rains received farmers are advised not to take up rabi sowings in excess moisture and advised to take up rabi crops when suitable weather conditions are prevailed.

Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
-------------------------	--------------------------------

Horticulture(Varieties)	Horticulture Specific Advisory
BRINJAL	<ul style="list-style-type: none"> • Vegetable crops were affected due to flow of water in cropped area. After rains receded apply booster dose of urea and potash. • The present weather conditions are favourable for little leaf virus in Brinjal. To control remove affected plants and spray imidachloprid @ 0.3 ml/L in clear weather

Others (Soil / Land Preparation) Specific Advisory:

Others (Soil / Land Preparation)(Varieties)	Others (Soil / Land Preparation) Specific Advisory
GENERAL ADVICE	Remove the excess stagnated water from nurseries, just transplanted paddy and crop at tillering wherever excess rains received.
